Broadcast & Post Solutions 2011 Line Card

*Monitor Wall Processors
 Nvision Routers & HD
 Broadcast Solutions*

High performance **Video Wall Processors**, Up/Down/Cross Converters and Terminal Equipment, Dolby & AC3 Audio Processing, **ATSC Loudness Meters & Nvision Routers & Master Control systems and Vertigo Channel Branding Engines.**

The **APANTAC** product line includes Data & Video Multiviewers, 3G Glue products and a full line of CATx & Fiber signal extender and switches. Apantac product designs are both clever and economical and have the features sets you expect.

*Dual, Triple & Quad
 LCD Multi-Panels*

LCD Rack Monitors from TV Logic offer a new high quality standard. A Quad, Triple, or Dual unit with HD/SD SDI with embedded audio decoding and metering, closed caption, and waveform & vector scope for SDI are all standard features on TV Logic monitors.

TV Logic

TV Logic is "Always ON AIR" with the most comprehensive line of LCD monitors available. With over 30 different Multi-Format models TV Logic has the production and broadcast features you need in the size you want. All at a price you will love. Demo TV Logic and see why.

*Ward Beck Systems
 HD Audio*

Ward Beck Systems has been serving broadcasters since 1967. For high resolution audio monitors, embedding, Dolby processing, loudness evaluation, terminal gear and switching, WBS builds stand alone or modular *OpenGear* products for all your audio needs.

Large LCD & Wall Displays by Planar deliver high-impact visibility for broadcast, control room, and public venues. 46" to 70" with the inputs, controls, and hardware you need for a long lasting precision mounted display installation at a surprisingly low price.

Masstech is the leading pioneer of media asset management (MAM) solutions for broadcast with cost-effective products that transform workflow processes and dynamically boost productivity.

ARG's products include an ASI/DS-3 protection switching and inverse multiplexing to enable multiple T-1 circuits to transport signals greater than 1.5 Mbps when larger bandwidth circuits are not available.

NanoFlash by Convergent Design is the world's smallest professional HD/SD recorder player. Camera mount the NanoFlash for 40 minutes of HD at 50Mbps on one 16GB Compact Flash. The NF holds two compact flash cards. Use the NanoFlash in any high vibration application.

MultiDyne's fiber optic transport systems for video, SDI, 3G HD, DVB/ASI, VGA, DVI, HDMI, audio, AES, Ethernet, data, CATV, as well as the company's other broadcast accessories are used worldwide.
